

Tabs3 Performance Comparison

Multi-User and Client Server Version (CSV)

This document compares the performance of **Tabs3 Version Multi-User** with **Tabs3 Version Client Server Version**.

The Client Server Version of Tabs3 and PracticeMaster typically runs common reports 10 to 30 times faster than the Multi-User Version. Below is an example of how one firm runs reports even faster using Client Server Version. For more information on CSV, see KB article **R10712**, or the CSV **White Paper**.

Function	Multi-User	CSV	Comparison
Summary WIP Report - Grand Totals Only (43,000 clients)	34 Minutes	1 Minute	34x Faster
Summary A/R Report (34 Pages)	29 Minutes	44 Seconds	40x Faster
Receipt Allocation Report (5 Pages)	37 Minutes	38 Seconds	59x Faster

HARDWARE CONFIGURATION

Server: Core 2 Duo, 2.4 GHz, 2GB RAM, Oplocks Disabled

Workstation: Pentium 2.4 GHz, 1GB RAM, Win XP

LAN: 100Mbps link

TestIO Results: Avg Write: 1.5MB/sec Avg Read: 1.78MB/sec

Notes:

- Your results will vary. Numerous factors affect the performance reported below including: characteristics of the data, report options chosen, network driver performance, AntiVirus programs and network load. Tabs3 cannot guarantee that these numbers are reproducible.
- The server has Opportunistic Locking disabled (as recommended by Tabs3). This is to ensure a more stable and realistic environment.
- The data in this document is up to date as of April 14, 2008.
